Application/Control Number: 09/901,122

Art Unit: 1745

## **DETAILED ACTION**

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a solid polymer electrolyte, a polymerizable composition for a solid polymer electrolyte and a battery comprising the solid polymer electrolyte, classified in class 429, subclass 317.
  - II. Claims 1-16, 19, drawn to an electric double-layer capacitor comprising a solid polymer electrolyte, classified in class 361, subclass 525.
  - III. Claims 1-16, 20, drawn to an electrochromic device comprising a solid polymer electrolyte, classified in class 252, subclass 500.
  - IV. Claims 21-22, drawn to a polymerizable compound, classified in class 558, subclass 277.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, III and IV are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a polymerizable compound for printing plates and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious

Art Unit: 1745

variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 3. Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because they are not disclosed as capable of use together and have different modes of operations, different functions and different effects such that Invention I is drawn to a battery which is a device used for generating an electric current by chemical reaction, Invention II is drawn to an electric double-layer capacitor which is used to store a charge temporarily and Invention III is drawn to an electrochromic device which contains an electrochromic medium which undergoes a change in transmittance to light.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. A telephone call was made to Mr. Kramer on April 15, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1745

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura Weiner whose telephone number is (703) 308-4396. The examiner works a flexible schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan, can be reached at (703) 308-2383. The fax phone number for non-after finals is 703-872-9310 and the fax phone number for after-finals is 703-872-9311.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.

Laura S. Weiner
